

## ***Limnologisches Seminar Sommersemester 2017***

**Montag, 13:00-14:00, Seminarraum Limnologie**

- 20.3.2017: Univ.Do. Dr. Katrin Teubner:** The response of zooplankton to long-term restoration and climate warming in Alte Donau.
- 27.3.:** **Iris Fischer:** Dragonflies of the Danube Island.
- 03.4.:** **Lukas Kühschelm:** Mysterious connections: the water network of Bad Vöslau (Austria)
- 24.4.:** **Axel Gauer:** Hot springs and cool organisms: phytobenthos along the thermal line in Austria
- 08.5.:** **Masumi Stadler:** Spatial and seasonal variability in dissolved organic matter optical properties and its biodegradability in a subalpine lake
- 15.5.:** **Anna Gschwandner:** Is *Arthrospira fusiformis* able to fix molecular nitrogen
- 22.5.:** **Ulrich Donabaum:** The enigma of N<sub>2</sub>-Fixation in *Arthrospira*
- 29.5.:** **Dr. Anna Sieczko:** Back to the future: effect of river-floodplain restoration on CO<sub>2</sub> evasion
- 12.6.:** **Dr. Elisabeth Ejarque Gonzales:** The effects of hydrological extremes on DOM dynamics in freshwater systems
- 19.6.:** **Kyle Boodoo:** Gravel bars are sites of increased CO<sub>2</sub> outgassing in headwater streams
