

Where: Seminar Room of the Division

When: Tuesdays from 11-12

- 11 Oct:** Cristina Romera-Castillo: "New nutrients control DOC distribution in the upper Atlantic Ocean"
- 25 Oct:** Florian Scharhauser: "Stilbonematology: Phylogeny and Biogeography of marine nematodes with chemoautotrophic symbionts"
- 08 Nov:** Barbara Bayer: "Beyond ammonia oxidation - Metabolic interactions between Thaumarchaeota and heterotrophic Bacteria in the ocean"
- 22 Nov:** Salvador Espada Hinojosa: "Partner fidelity feedback mechanism maintains the dual partnership of *Zoothamnium niveum* and its thiotrophic ectosymbiont *Candidatus Thiobios zoothamnicoli*"
- 06 Dec:** Zihao Zhao: "Proteomic characterization of deep sea dissolved organic matter"
- 13 Dec:** Maria Pinto: "Marine plastics and microbial communities"
- 13 Dec:** Teresa Langer: "Solar radiation and plastics - Influences on microbial colonization?"
- 24 Jan:** Paul Steiner: "Seasonal phylogenetic and functional succession of bacterial communities in marine snow in the Adriatic Sea"
- 24 Jan:** Gabriela Dangl: "Antioxidant properties of the dissolved organic matter produced by marine phytoplankton"
